## Education

### B.Tech in Electrical Engineering

2022 - 2026

*Shri G.S. Institute of Technology and Science, Indore*

## Experience

### Dice Enterprises

Jan 2026 – Present

*Software Development Engineer Intern*

- Interning at a **product-based enterprise SaaS company** building scalable solutions for corporate spend management, procurement, and payment workflows.
- Working with an in-development **React Native** mobile application, understanding production-grade mobile architecture and cross-platform patterns.
- Analyzing the React Native codebase including component abstraction, navigation flow, API integration, and state management practices.
- Reviewed the corresponding web application to understand shared business logic and API contracts across platforms.

### PixelTech

May 2025 – Aug 2025

*Software Development Engineer Intern*

*On-Site*

- Built and maintained scalable, responsive user interfaces using **React.js** for client-facing products and internal dashboards.
- Contributed to production-ready features by implementing reusable components, improving UI performance, and fixing real-world bugs.
- Worked with modern state management tools including **TanStack Query** and **Redux** to handle server state and application logic.
- Implemented and customized component libraries such as **Chakra UI** and **ShadCN UI** to ensure consistent design systems across applications.

## Projects

### GS-Academia (Ed-Tech Platform) [Github Link](#) | [Deployed Link](#) (June'24 - July'24)

**Tech Stack:** React.JS, Node.JS, Express.JS, MongoDB, Cloudinary-API

- Designed and developed a full-stack EdTech platform with a responsive UI used by 50+ active students and instructors.
- Built course pages with video content, notes, reviews, and progress tracking for 3 subjects.
- Created role-based dashboards for instructors and students to manage courses, enrollments, and content.
- Integrated Cloudinary for media handling and Razorpay for secure course payments.

### Collaborative Rich Text Editor [Github Link](#) | [Deployed Link](#) (Dec'24 - Jan'25)

**Tech Stack:** React, Next.js 15, Tailwind CSS, Radix UI, Tiptap, Liveblocks, Clerk, Shadcn UI

- Built a collaborative rich text editor supporting real-time multi-user editing and advanced formatting features.
- Implemented comments, mentions, notifications, and role-based workspaces.
- Added support for images, tables, and document export in PDF, HTML, TXT, and JSON formats.
- Secured authentication using Clerk and optimized UI using Shadcn UI and Tailwind CSS.

## Skills

**Programming Languages:** C, Java, JavaScript

**Frontend Technologies:** React.js, React Native, Next.js, HTML, CSS, Tailwind CSS

**Backend Technologies:** Node.js, Express.js, MongoDB

**State Management & Data:** Redux, TanStack Query

**Developer Tools:** Git, GitHub, VS Code, Postman

**Cloud & Deployment:** Vercel, Cloudinary

**Design Tools:** Figma, Canva

**Soft Skills:** Team Collaboration, Problem Solving, Clear Communication

## Additional Experience & Achievements

- Solved **300+ Data Structures and Algorithms problems** on platforms like LeetCode, strengthening algorithmic thinking and problem-solving skills.
- Actively build **AI agents and automation tools** to solve real-world personal problems using LLMs, embeddings, embeddings-based similarity, and rule-based decision systems.
- Experience working on **freelance development tasks**, collaborating with clients to deliver production-ready features, bug fixes, and UI improvements.
